

Plot #'s were generated during the radar survey of 2006 and reference is made to the 1983 Geneological Society survey of rows. Some numbers do not exist. There may be space where a new plot could be placed in numerical order, however as of the year 2010 the modern plot numbers began with # 1000, except for designated family plots. Plots are not assigned, they are picked, but compared to the radar map to avoid possible older buriel sites. Cre mains granite benches, memorials, or small family size columbariums have been approved for use above possible radar marked sites where no other marker is in evidence.

**Cokes Chapel
Cemetery**
